

Cooling.

Professional chefs know that there are great differences in how food needs to be stored. Some foodstuffs require that little bit longer to mature while others favour a particularly cool environment. Exclusive drinks are stored at cool temperatures but need to be brought up to drinking temperature with care and precision. In order to meet the highest demands, we've continued to develop our range of cooling appliances unabated.

Stainless steel interior.

The interiors of all the appliances in our Vario cooling 400 series are panelled in stainless steel – a material chosen for more than just its visual qualities. Stainless steel also guarantees 100 per cent hygiene. Giving off no harmful substances itself, when in contact with oxygen and moisture it can work to neutralize odours. This added benefit takes place at the molecular level and – in the refrigerators at least – remains completely invisible to the human eye. In the freezers, by contrast, the stainless steel is covered by an extremely thin sheen, resembling a frost pattern that provides visible proof of the appliance's functionality.

GAG

Bottle trays made from untreated beech.

At Gaggenau, wine storage is an art form in itself. Sophisticated technology makes for almost vibration-free operation while providing an environment that approaches the ideal conditions of a cool wine cellar. The valuable bottles are stored in exclusive and prestigious style on solid trays that can easily be extended. These are made from aluminium and untreated beech, thereby preventing any transfer of taste or aroma. Furthermore, the beech rods are rounded. Apart from looking good, this also helps to protect the delicate wine labels.

Stainless steel interior and aluminium door racks.

There is more to Gaggenau cooling appliances than precise technology that cools to the exact degree. The interiors of all appliances in our Vario cooling 400 series are lined with stainless steel, a material chosen for its aesthetic appeal and hygienic qualities. The shelves are made from hardened safety glass while the door racks are made from solid shot-blasted aluminium. These are made with millimetre precision and fitted by hand.

GAGGENAU

Pictured fitted with customised panels and handles to match your kitchen cabinetry (not supplied). Gaggenau aluminium and stainless steel door panels with handles available as optional accessories. Refer to page 113 for further details.

Vario cooling 400 series.

The Vario cooling series is a modular system made from fully integrated built-in appliances. Refrigerators, freezers and wine cabinets can be combined to form an elegant cooling wall. For those who prefer aluminium doors rather than the individual furniture panels, these are available as an optional extra. The interiors of Vario cooling appliances are stainless steel throughout. Ample illumination is provided by the side light elements and ceiling spots.

Pictured fitted with Gaggenau aluminium doors (optional accessory). Refer to page 113 for further details. Vario wine cabinet RW 464 (left), refer page 110.

Vario refrigerator RC 462.

The RC 462 refrigerator (right), is shown here together with the freezer RF 463 (centre).

- Dimensions: 61 cm wide; net volume 365 litres.
- Stainless steel interior: Uniquely beautiful design, hygienic.
- Generous lighting concept: Side lighting elements and ceiling spots light up the entire interior.
- Solid aluminium door racks: Fitted by hand and capable of withstanding heavy loads.
- Safety glass shelves: For the optimum use of space, all shelves can be positioned individually.
- Motorised shelf: Can be adjusted even when fully loaded at the press of a button.
- Dynamic cold air distribution with Multi-Air-Flow: Ensures even temperature distribution across the entire cooling area at precise, constant temperatures.
- Fresh cooling close to 0 °C: Temperature-regulated cooling drawer from 0 °C to 3 °C, for cooling easily spoiled food such as fish, meat or vegetables.

Vario freezer RF 463.

Freezer compartment offering all the conveniences of modern deep-freeze storage. With electronic temperature control from -14 °C to -25 °C.

- Dimensions: 61 cm wide; net volume 294 litres.
- Stainless steel interior: Uniquely beautiful design, hygienic.
- Solid aluminium door racks: Fitted by hand and capable of withstanding heavy loads.
- Ice and water dispenser: With pull down flap to accommodate large pitchers.
- No-Frost technology with fast freezing: No more tedious clearing out and defrosting of your freezer manually. Also prevents the harmful formation of frost on foodstuffs.

Vario wine storage and temperature control cabinet RW 464.

The RW 464 enables adjustment of temperature to the precise degree for two separately controllable climate zones. One may be used for storage at cellar temperature for example, while the other is used for storage at drinking temperature.

- Dimensions: 61 cm wide; net volume of 394 litres; space for up to 101 bottles (0.75 litre standard Bordeaux wine bottles).
- 2 temperature zones: for the separate storage of red and white wine at cellar temperature or, alternatively, storage at cellar temperature and drinking temperature. Humidity and temperature are separately controllable from 5°C to 18°C.
- 10 bottle trays: made from beech and aluminium, fully extendable. Four of the bottle trays are also suitable for storing magnum bottles.
- Lighting concept: wines are generally stored in darkness. A light can be turned on which displays certain bottles.
- Low vibration operation: thanks to cushioned compressor suspension.

Each module in the Gaggenau Vario Cooling series is designed to be fitted with customised doors and handles (not supplied) to coordinate with your kitchen cabinetry or with optional Gaggenau aluminium or stainless steel door panels.

RA421 630 Aluminium door panel and handle to suit RC462. Suitable for left or right hinge.

RA422 630 Aluminium door panel and handle to suit RF463. Left hinge.

RA421 631 Aluminium door panel and handle to suit RW464. Left hinge.

RA421 632 Aluminium door panel and handle to suit RW464. Right hinge.

RA425 130 Aluminium door bar handle.

RA421 610 Stainless steel door panel and handle to suit RC462. Suitable for left or right hinge.

RA422 610 Stainless steel door panel and handle to suit RF463. Left hinge.

RA421 611 Stainless steel door panel and handle to suit RW464. Left hinge.

RA421 612 Stainless steel door panel and handle to suit RW464. Right hinge.

RA425 110 Stainless steel bar handle.

RA093 630 Aluminium bottle presenters set 3.

RA492 630 Fully extendable aluminium shelf suitable for open bottles and decanters.

RA450 010 Activated charcoal filter for water filter system including saturation indicator.

NOTE: When the distance between the modules is less than 160mm an additional side heating element (RA460 011) is required. Refer to the Models & Dimensions brochure for specifications and installation planning guides and notes.
